

Grand Tour Photo Spots.

Breathtaking four-thousand-metre peaks, charming hilly landscape, mediaeval towns, the roaring Rhine Falls – the sights of interest along the Grand Tour are lined up like a string of pearls. We place the most attractive viewing places along the route in centre stage for our guests.

The best way to remember picture-book Switzerland

To ensure that our guests don't miss out on any of these great locations, the Grand Tour Photo Spots are actually signposted on the road.

Incidentally: Each Photo Spot also provides information on the special features of the location and is an invitation to have fun in putting yourself in the spotlight.

The number is increasing all the time!

The first Photo Spot was installed in the Emmental in April 2016 and new ones are being continually added.

Our guests share their most attractive photos with us and their friends!
